

Working with the News Module (news.xml)

The news and service modules are flexible modules that can be easily customized. Below is a list of options:

GLOBAL SETTINGS

`<itemWidth>`

the width of your news photos

`<itemHeight>`

the height of your news photos

`<useStyleSheet>`

choose to use a style sheet for your news text, true/false

`<styleSheetUrl>`

the url to your style sheet

NEWS ITEM XML

`<item>`

```
    <date>24 MAR 2010</date>
    <image>images/news/3.jpg</image>
    <title><![CDATA[<!-- BEGIN -->The HTML Title <!-- END -->]]></title>
    <text><![CDATA[<!-- BEGIN -->The HTML Text<!-- END -->]]></text>
```

`</item>`

`<date>`

the date of your news item. This can be written in any date format

`<image>`

the url to your services image

<title>

the title of your services item, HTML permitted

<text>

the text of your news item, HTML permitted
